Surveillance Summary

Data in this report includes cases diagnosed with HIV/AIDS and reported as of June 30, 2013¹.

- In 2011, Louisiana ranked **3rd** in the nation for estimated HIV case rates (30.2 per 100,000 population) and 11th in the estimated number of HIV infection cases. The New Orleans MSA ranked **2nd** in the nation and the Baton Rouge MSA ranked **3rd** in the nation for estimated HIV case rates (43.0 and 41.6 per 100,000, respectively), among the large metropolitan areas in the nation. The most recent *CDC HIV Surveillance Report* (Vol. 23), for the first time, had a national comparison of estimated HIV case rates.
- According to the same report, Louisiana ranked **4th** highest in estimated state AIDS case rates (18.1 per 100,000) and 11th in the number of estimated AIDS cases in 2011. The Baton Rouge metropolitan area ranked **1st** in estimated AIDS case rates (29.4 per 100,000) and the New Orleans metropolitan area ranked **4th** in estimated AIDS case rates (25.3 per 100,000) in 2011 among the large metropolitan areas in the nation.
- A total of **18,974** persons are living with HIV/AIDS in Louisiana; of these individuals, **10,360** persons (55%) have an AIDS diagnosis.
- Among women living with HIV/AIDS, the predominant known mode of transmission is high-risk heterosexual contact followed by injection drug use. Among men living with HIV/AIDS, the predominant mode of transmission is men who have sex with men followed by high-risk heterosexual contact.
- The primary risk factor for new HIV diagnoses in Louisiana is men who have sex with men (MSM). In 2012, of the persons who reported a risk factor, 63% reported being MSM, and an additional 2% reported being MSM and an injection drug user (IDU). As of June 30, 2013, 51% of all people living with HIV infection in Louisiana were MSM.
- In 2012, **1,170** new HIV cases were diagnosed in Louisiana. Of these cases, **32%** (n=374) occurred in Region 1 (New Orleans) and **24%** (n=275) occurred in Region 2 (Baton Rouge).
- In 2012, **798** new AIDS cases were diagnosed in Louisiana. Of these cases, **32%** (n=256) occurred in Region 1 (New Orleans) and **25%** (n=200) occurred in Region 2 (Baton Rouge).
- In Louisiana, **29%** of new HIV cases and **32%** of new AIDS cases are among women.
- HIV continues to disproportionately affect African Americans in Louisiana. In 2012, **74%** of newly diagnosed HIV cases and **79%** of newly diagnosed AIDS cases were among African Americans. African Americans make up only 32% of Louisiana's overall population.
- A large percentage of new diagnoses occurred among adolescents and young adults. In 2012, **24%** of all new HIV diagnoses occurred among persons 13-24 years old and an additional **27%** occurred among persons 25-34 years old.
- As of June 30, 2013, a cumulative total of **33,720** HIV/AIDS cases have been reported in Louisiana since the beginning of the epidemic, including **338** pediatric cases. The cumulative total includes persons that are deceased.
- The cumulative number of deaths among persons diagnosed with HIV/AIDS, reported to the Louisiana Office of Public Health through June 30, 2013, is **14,490** including **113** deaths among pediatric cases.

¹Please note: This report reflects only information reported to Louisiana's HIV/AIDS surveillance system.

Persons Living with HIV/AIDS

Louisiana
as of June 30, 2013

- **33,720** cumulative cases have been detected in Louisiana since the beginning of the epidemic, including **338** pediatric cases.
- **14,490** cumulative deaths among persons with HIV/AIDS have occurred in Louisiana since the beginning of the epidemic, including **113** pediatric deaths.
- **18,974** persons are currently living with HIV/AIDS in Louisiana.
Persons living with HIV: **8,614**
Persons living with AIDS: **10,360**
